Valuation Summary

This report appraises SkAIxuIDEPro as a transferable proof asset: a multi-app launcher routing into a local-first workstation suite (IDE, encrypted vault/control plane, document authoring, Monaco-based web build tools, and AI modules). The valuation reflects delivered scope and packaging quality, and explicitly excludes traffic, usage volume, and sales outcomes.

$167,900

2026 Proof-Asset Valuation (single-number appraisal)

Asset Snapshot

Field	Value
Site URL	https://skaixuidepro.netlify.app/
Valuation date	2026-02-24
Total valuation	$167,900
Apps listed on launcher	12 installed
Public pages sampled	4 (launcher + IDE + vault + docx)
Primary posture	Multi-app launcher + IDE workstation + encrypted vault...
Key integrations observed	IndexedDB/local-first storage; API key gating; CDN-loa...
Known polish item	Resolve Neural Space client error; remove stub modules...

Valuation Breakdown

Component	Amount (USD)
Brand & Visual System (console UI, intro sequence,	$18,900
Launcher Architecture & Navigation (APP_LAUNCHER_V1.1,	$14,600
SkAIxu IDE Core (workspace editor, file model, export/commit	$55,900
SkyePortal Vault Control Plane (AES-GCM local encryption,	$39,400
Build & Document Tools (Skye DocX + WebPile Pro:	$28,600
AI Modules Bundle (Neural Space Pro + Magic + Nexus Pro:	$26,800
Utilities Bundle (Sovereign Variables + SkyeBox + SkyeKni...	$11,900
QA & Release Readiness (cross-app link integrity, UI	$19,800
Completeness & Dependency Haircut (observed client	-$48,000
Total	$167,900

Quality and Scope

Quality Scorecard (Internal Rubric)

Category	Score (0...	Weight	Weighted
Brand & Visual Cohesion	9.3	15%	139.5
Information architecture (hub to apps)	9.0	15%	135.0
Product depth (tool suite)	8.8	25%	220.0
Security / privacy posture	8.6	15%	129.0
Offline / local-first readiness	8.4	10%	84.0
Reliability & error handling	7.2	10%	72.0
Maintainability signals	7.4	10%	74.0
Composite	8.54	100%	85.3/100

Scope

This appraisal values the website as a proof asset (brand hub + shipped systems). It excludes traffic history, rankings, conversion performance, and any revenue-based valuation. External services and API usage costs are not included.

Included

- Public pages and systems sampled as evidence (see Evidence URLs).
- Observed routing, UI flows, and packaging quality as a unified branded suite.
- Visible integration cues (e.g., payment CTAs, key gating, local-first storage patterns) where publicly observable.

Excluded

- Traffic, revenue, close rates, and pipeline performance.
- Private repositories, backend services, or admin systems not publicly visible.
- Licensing valuation for third-party APIs or services (payments, AI providers, auth providers).

Appendix

Measured observations (live scan)

- Neural Space Pro page shows a client error state; treat as a reliability/UX ding until resolved.
- Some modules appear as minimal stubs (e.g., Nexus DB Explorer, Nebula TaskForce), reducing delivered completeness.
- WebPile Pro depends on a CDN for Monaco; if blocked, editor may stall (fragility risk).
- Multiple modules require API keys / virtual keys; key storage and scoping should remain session- only or vault-only.
