Valuation Summary

This report appraises Solenterprises AI Division (Kaixu Platforms) as a transferable proof asset: portfolio architecture, editorial library, platform positioning, and deployment-ready hygiene. It excludes revenue, traffic, pipeline, and conversion-performance valuation.

$29,750

2026 Proof-Asset Valuation (single-number appraisal)

Asset Snapshot

Field	Value
Site URL	https://solenteaiskyes.netlify.app/
Valuation date	2026-02-24
Total valuation	$29,750
Primary platform landings	/gateway • /skaixu • /push
Insights hub	/blog/

Quality and Scope

Quality Scorecard (Internal Rubric)

Category	Score (0-10)	Weight	Weighted
Information architecture	8.3	15%	124.5
Content system (editorials + platform story)	8.4	20%	168.0
Conversion plumbing (contact hub + CTAs)	7.6	15%	114.0
SEO/index readiness (meta, robots/sitemap)	7.7	20%	154.0
Security posture + edge behavior	8.2	15%	123.0
Technical hygiene (consistency + packaging)	8.1	15%	121.5
Composite	**8.05**	**100%**	**80.5/100**

Scope

This appraisal values the site as a proof asset (portfolio + editorial + positioning). It excludes software-product valuation and all sales-performance measures.

Included

- Portfolio site shell and navigation (Platforms • Company • Support • Network).
- Platform landings and internal specs/credibility pages.
- Insights hub and long-form editorials (operator notes).
- Indexing artifacts (robots endpoint; sitemap endpoint) and basic SEO meta templates.
- Security posture copy and operator-grade positioning elements.

Excluded

- Revenue/traffic valuation, rankings, lead volume, or conversion performance.
- Valuation of the underlying software products themselves (Gateway13/SkAIxu/Kaixu Push).
- External properties linked via Network (valued separately).

Appendix

Measured notes (from live inspection)

- Observed primary pages: Home + 3 platform landings + Insights hub + 5 editorials + 3 company pages + robots endpoint.

- Observed platform messaging: governance routing, policy enforcement, audit trails, billing posture.

- Sitemap endpoint is referenced by robots; some automated fetchers may error—validate in browser/Search Console.
