Valuation Certificate

SOL DevProof Lab — Codebase Audit, Gauntlet Testing, Valuation Certificate

Certificate No: SOL-DPL-2026-AE40B **Issue Date:** 2026-02-23

Client / Product	Skyes Over London LC — WebPile Pro F500 Neon (Netlify + Neon)
Repository / Version	webpile-pro-f500-neon-netlify-v2.8.0-scim-advanced-filters-members-paginatio n.zip v2.8.0 | ZIP SHA-256: a5bf905981348f84… | API SHA-256: ab2c954e15c58938…
Assessment Date	2026-02-23
Scope	Single-file web studio + Netlify Functions API + Neon/Postgres schema; included CI workflows, SBOM artifacts, and test harness. Valuation tied to submitted ZIP fingerprint.
Readiness Scorecard	Avg 70/100 (Security 82/100; DevEx 82/100)
Key Strengths	• CI + CodeQL + secret scanning + lockfile + SBOM present • OIDC SSO schema + endpoints present • ETags + preconditions implemented across resources
Required Hardening	P0: Repair SCIM handler control-flow (current SCIM user/group blocks are merged/unreachable) P1: Add metrics/tracing hooks and alerting runbooks P2: Modularize API and add conformance suites (SCIM/OIDC) for regression safety
Valuation Range (USD)	$68,880 to $115,430
Methodology Summary	Replacement cost $84,000–$119,000 plus completion budget $105,600–$149,600 with readiness/risk adjustment.
Signatory	Skyes Over London LC | SOL DevProof Lab | Authorized Reviewer

Terms (plain-English)

• This certificate is an appraisal based on observed code behavior, evidence artifacts, and stated assumptions. It is not a warranty or guarantee.
• Client retains full IP and creative control. Optional patch work is delivered via PRs or a versioned ZIP; client approves merges.

- Third-party integrations (IdP/email/CI) may affect readiness outcomes.
